INTRODUCTION

Here at the Nexus Surgical Vascular and Vein Centre, we believe in a holistic approach in finding the most comprehensive solution to treat vascular problems.

We practice evidence-based medicine and utilise the latest in technology and the most advanced surgical techniques to deliver quality and cutting edge care to our patients.

Your visit to Nexus Vascular and Vein Centre will start with a smile from our friendly staff.

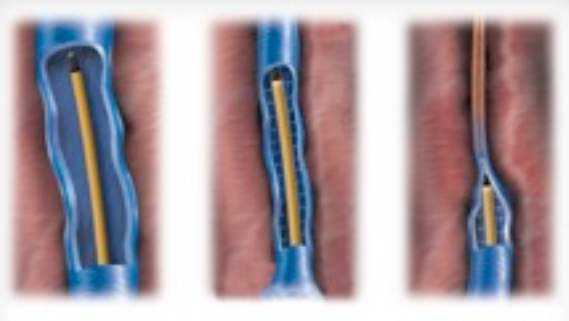

Your consultation with the vascular specialist will include a detailed history taking and physical examination, followed by an ultrasound scan performed in the clinic to diagnose your vascular problem.

At Nexus Surgical Vascular and Vein Centre, our vascular specialist is trained in both open surgery as well as minimally invasive options. He has extensive clinical experience and will be able to discuss with you and help you with your decision making process.
